

1 Overview

The DIO-3460 is a space-saving industrial I/O module with 12 opto-isolated inputs and 12 relay outputs.

Application software can read the state of input ports and control the state of the relay outputs.

Integrated watchdog functionality opens all relay contacts if the communication with the controlling application program is broken, or an internal firmware stuck has been detected.

An IMPORTANT NOTICE at the end of this document addresses availability, warranty, changes, use in safety-critical applications, intellectual property matters and other important disclaimers.

2 Programming

The DIO-3460 is controlled by an application program.

Class Documentation

Class documentation for DIO-3460 is provided here: [annotated class reference](#), [file list](#), [namespace list](#), [functions](#), [examples](#).

The [dio_demo](#) example demonstrates how to use a single DIO-3460 in an application program.
